

School Development Plan Targets 2022-2023

Target 1 - Standards (Learning)

To develop a 'Love of Reading' culture to support the development of children's vocabulary and their oracy skills in both English and Welsh.

Target 2 - Wellbeing and attitudes to learning/Care and Support

To develop a whole school approach to Nurture, which will support a revised behaviour management and rewards system.

Target 3 - Teaching and Learning

To review, evaluate and refine curriculum design to reflect the Four purposes and principles for progression, developing an effective assessment system.

Continuation of the following to ensure embedded and sustained practice:

- Continued implementation of the White Rose Maths Mastery scheme of work to ensure embedded application of the four rules of number: focusing on multiplication across all progression steps. This will aid the development of problem solving and reasoning, at an appropriate individualised level. (Resources: White Rose, National Testing, SAFMEDS)
- Modern Foreign Language (French) - Continue to embed the use of Language Angels to support and plan for the development of children's French language skills.
- To continue to fully implement the new ALN system.
- **Leadership**
Continue to increase opportunities for Governor activity to allow collaboration, training and robust accountability linked to school priorities, pupil voice and A.L.N.
